37	Exercise 5.2B	16	Problem is not feasible. Omit or substitute the following: A, B, and C are three rectangles. The width of A is 4 cm longer than the width of B. The width of B is 1 cm longer than the width of C. The length of A is 16 cm shorter than the length of B. The length of B is 9 cm shorter than the length of C. If A, B and C have the same area, find the area of each rectangle.	1999
